The COVID-19 pandemic and Te Pae Tata Interim New Zealand Health Plan 2022 has put the spotlight on the use of remote technologies to support the delivery of healthcare. Efforts to alleviate the burden on hospitals and healthcare staff are becoming increasingly crucial, and there is a growing recognition of the advantages offered by remote technologies.

This upcoming webinar will relaunch the Remote Patient Monitoring (RPM) Guide, developed to support best practice adoption of RPM in Aotearoa New Zealand. We are excited to have speakers who have contributed to the guide and will delve into the key themes.
